| <p>This is the first of the military papers. It is at best a start on the hardware problem but the start that was needed to get an analytical base from which to approach the problem. I think that it will be exceedingly useful research aid or reference document to DCI, CSS, DIA and especially for our own development in this field. I have had occasional worries that someone may take this and run with it (DIA perhaps), but it seems to me the availability of the document outweighs the risk.</p> <p>(Other Coordinating Analysts)</p> <p>M/AS<br/>MS/EE<br/>M/GMD</p> <p>25X1A9a</p> <p>PLS.</p> |                                    |  |   |   |        |
